Dear Cliff,

Thank you for the valued input that you provided throughout our development and presentation stages. It sure helps us focus when we know exactly what our client's require.

Here are some points of discussion as we move forward:

Refine Showcase Design

Neiman Marcus

- a) We are awaiting information from your group as to how we can modify our design to best fit everyone's needs.
- b) Could you supply all possible island configurations (or average) used by Fine Jewelry, Designer and Watch? It will help us determine the optimum width(s) of the showcase(s).
- c) Please supply contact information for the glass frame (Stylemark??).

DisplayWorks

- a) We are working on incorporating the battery back-up system with our electronics system.
- b) We are reviewing every component to maximize efficiency, durability, and any improvements that we can make to the prototype model.
- c) We are considering ways to maximize your shelf size.
- d) We are refining our component costs and analyzing cost changes in 5'W, 6'W, 7'W and 8'W showcases.
- e) When we receive dimensions on your typical showcase island, we can determine the size of the clipped corner showcases.
- f) Please confirm when you would like us to pick-up the prototype. We would like to upgrade and test some new ideas on it. It will also be helpful in firming up production methods.

DISPLAYWORKS

Schedule

- Neiman Marcus to supply showcase revision requests
- DisplayWorks to modify design
- DisplayWorks to build four (4) showcases with modified design for Neiman Marcus (downtown Texas).
- Neiman Marcus to develop production schedule (delivery date, number of units, department, store location, etc.).

Please feel free to call me with any questions or if I can be of assistance to you in anyway. It is truly a pleasure working with you and I look forward to the future.

Sincerely,

Thomas W. Casey

**RE: NEIMAN MARCUS
MECHANICALLY LOWERING SHOWCASE PROTOTYPE**

Dear Tom:

We at Neiman Marcus extend to you our sincere thanks for an excellent presentation of the prototype. All in attendance were impressed with the quality of the case and its features. We look forward to the fine-tuning stage of its development.

In response to your letter of March 5, 2001, I will follow the same format as your letter.

Neiman Marcus

- a) I will be coordinating the information from our group over the next few weeks.
- b) We have no standard island configurations. Each is designed for the space allocated. Therefore, it's best to stay with individual cases in lieu of islands.
- c) Larry Johnson of Stylemark should have made contact with you by now.

DisplayWorks

- a - d) Looking forward to your findings.
- e) This will have to be on a project by project basis as indicated in NM b) above.
- f) Prototype was picked up Wednesday, March 14, 2001.

Schedules

- Hope to get back to you by early April.
- No comment.
- Need to confirm building of these four (4) cases.
- Should have a good idea by early April.

Again, thanks for your superb presentation. We look forward to finalizing the development with you.

Sincerely,
NEIMAN MARCUS

Clifford J. Swan
